

```

// WAP that print ASCII no. and its corresponding ASCII char.
void main()
{
    unsigned char i;
    clrscr();
    printf("\n");
    for(i=0 ; i<127 ; i++) //i=i-1
    {
        printf("%d\t%c\t",i,i);
    }
    getch();
}

/*
    i
    1
    2
    4
    8
    16
*/

```
