```c
// Example Of goto statemeent
#include<math.h>

void main()
{
    double n;
    clrscr();
    L1: // Backward Jump
        printf("\nEnter a no (0 to t

                                    erminate):");
        scanf("%lf",&n);
        if(n<0)
            goto L2;   // Forward Jump
        printf("\n  Square Root Of %.2lf is %.2lf",n,sqrt(n));
        L2:
        if(n!=0)
            goto L1;
    getch();
}
```
