```c
// Demo of simple if statement
// Input age and check whether the person is elligible for voting or not.

#include<stdio.h>
#include<conio.h>

void main()
{
      int age;
      clrscr();
      printf("Enter age:");
      scanf("%d",&age);
      if(age>=18)
      {
            printf("\nYou are elligible for voting");
      }
      printf("\n Out of simple if block");
      getch();
}

/* Input marks of 3 subjects. WAP that print result (Pass/ Fail / ATKT)
   using simple if statement
   Pass => If marks of all sub. >= 40
   ATKT => If marks of any one sub < 40 and remaining >=40
   Fail => Otherwise
*/
```
