```c
// Input 10 nos. WAP that calculate and print sum and avg. of the nos.

void main()
{
    int n, sum=0, i;
    float avg;
    clrscr();
    for(i=0;i<10;i++)
    {
        printf("Enter a no:");
        scanf("%d",&n);
        sum = sum + n; //sum+=n;
    }
    avg = sum / 10.0;
    printf("\n Sum = %d \n Avg = %.2f",sum,avg);
    getch();
}
```
